CASE STUDY · GOVERNMENT

A Wellington government site. One view of every door.

Inner Range Integriti

CCTV

Alarm monitoring

24/7 NOC

Swipe to see how →

01 THE CHALLENGE

A system built up over many years.

Multiple procurement cycles

Different vendors, added over time.

Incomplete integration

Systems that didn't talk to each other.

No single view

No clear picture of who was accessing what, and when.

02 THE DESIGN

One integrated system.

Inner Range Integriti

Access control across every entry point.

CCTV and alarms

Layered in and linked to access events.

24/7 monitoring

Through our Network Operations Centre.

Resilient connectivity

Stays online when connectivity is interrupted.

03 THE INSTALL

How we delivered it.

1 **Every entry point covered**

2 **Integrated with existing IT under agreed governance**

3 **Performance checked against the compliance schedule**

4 **Handed over with full documentation**

04 THE OUTCOME

Visibility over their own environment.

- One management platform for the site
- A full audit trail for every access event
- 24/7 monitoring with resilient connectivity

Audit on the horizon? Talk to us.
