01 THE BRIEF

A Wellington home that needed more than an alarm.

Two incidents at neighbouring properties prompted a full security review.

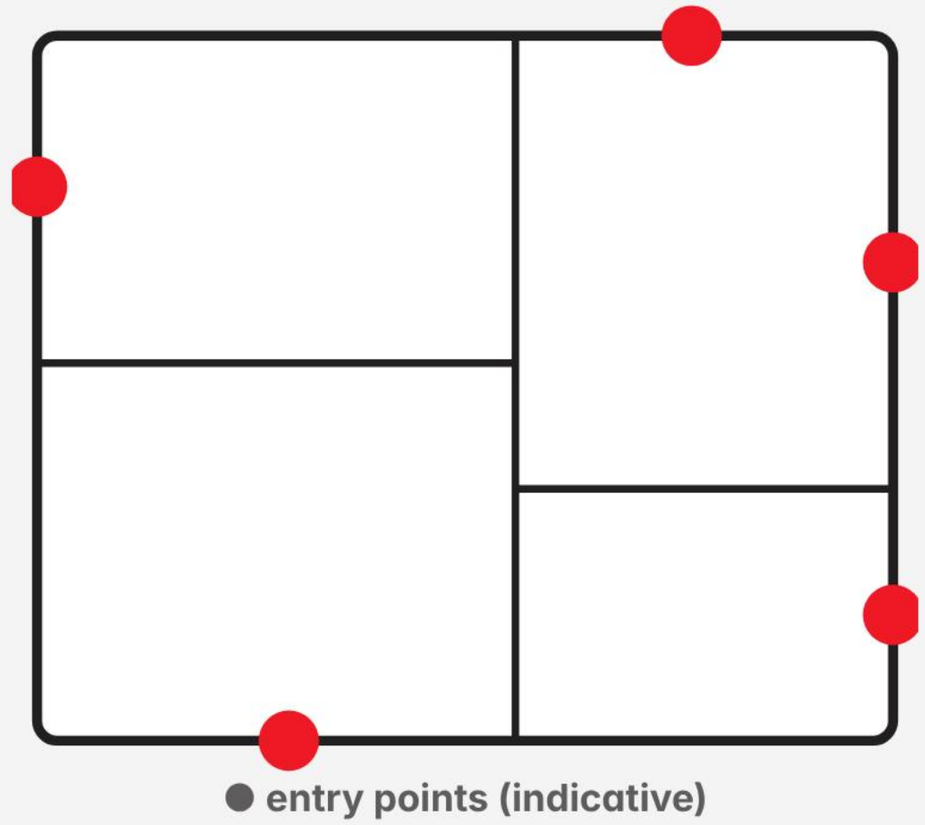

THE ASK

CCTV, access control and alarm monitoring — working as one, with no compromise on how the home looks.

02 THE CHALLENGE

What made this difficult.

- **Multiple entry points and heritage character to protect**
- **No existing cabling — every run had to be concealed**
- **Simple enough for the whole family to use**

● entry points (indicative)

03 THE SYSTEM

What we installed.

CCTV

4K cameras with night vision and motion analytics

Access control

Keypad and fob entry with zone-based permissions

Alarm

Intruder detection with a 24/7 monitoring link

One app

Control all three systems from a single app

04 THE INSTALL

How we did it.

1 Concealed cabling throughout

2 Hardware chosen to suit the home

3 Full commissioning and testing

4 Walkthrough with the family

05 THE OUTCOME

What the client has now.

- Full visibility across the property
- Remote arm and disarm
- Instant alerts on any breach
- No visible hardware from the street

Book a residential security review
